

# Cloud Endpoint Management

Endpoint Security Management, Make IT Simple for Complicated Works

## Simple Management

Walk You Through Policy Setup in a Snap & Your Security Platform in Front. This combination of the two areas lets you decide what to do to keep or raise your organization's security level: status quo for nothing to do or drill down from the platform in depth to remedy endpoints.

## Location Free

Secured Anywhere and Everywhere. Your endpoints take their each security policy (anti-vulnerability measures) with the endpoints, and even changes in security settings via networking.

## Multi Layered Security Approach

Safeguards your endpoints from known vulnerabilities and UNKNOWN threats.

## Data Loss Prevention

Data Loss Prevention via external storage devices backed by keeping track of end user operations on endpoints.
