

HOW TO KEEP YOUR EMPLOYEE **PRODUCTIVE** WHILE **WORKING FROM HOME**

WE PROVIDE YOU **THE BEST SERVICE**

Amazon WorkSpaces

is a managed, secure Desktop-as-a-Service (DaaS) solution. You can use Amazon WorkSpaces to provision either Windows or Linux desktops in just a **few minutes** and **quickly scale** to **provide thousands of desktops** to workers across the globe.

With AWS, your employees get the fast, responsive desktop of their choice that can be accessed **anywhere, anytime**, from **any supported device**.

Benefits

SIMPLIFY DESKTOP DELIVERY

Amazon WorkSpaces helps you **eliminate many administrative tasks** associated with managing your desktop lifecycle including provisioning, deploying, maintaining, and recycling desktops.

KEEP YOUR DATA SECURE

Amazon WorkSpaces is deployed within an Amazon Virtual Private Network (VPC), **provide each user** with access to persistent, encrypted storage volumes in the AWS Cloud, and integrate with AWS Key Management Service (KMS). No user data is stored on the local device. This helps improve the security of user data and reduces your overall risk surface area.

REDUCE COSTS

Amazon WorkSpaces **eliminates** the need to **over-buy** desktop and laptop resources by providing on-demand access to cloud desktops that include a range of compute, memory, and storage resources to meet your users' performance needs.

CENTRALLY MANAGE AND SCALE YOUR GLOBAL DESKTOP DEPLOYMENT

Amazon WorkSpaces is **available in 13 AWS Regions** and provides access to **high performance cloud desktops** wherever your teams get work done. You can manage a global deployment of many thousands of WorkSpaces from the AWS console. And you can rapidly provision and de-provision desktops as the needs of your workforce change.
