

Transforming Data Integration
From "Creation" To "Connect"

DataSpider® Servista

Data integration software that easily and conveniently connects every data from the cloud to legacy systems.

OVERVIEW

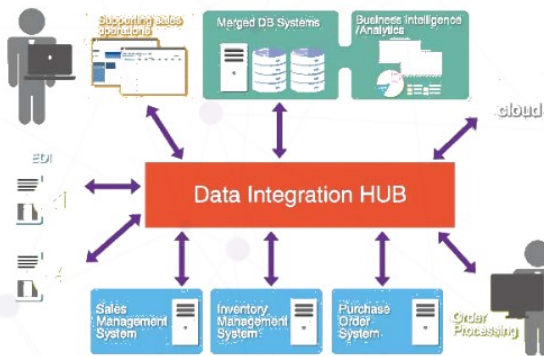

No Coding
Required

Integrate &
Streamline

Execute at
High Speed

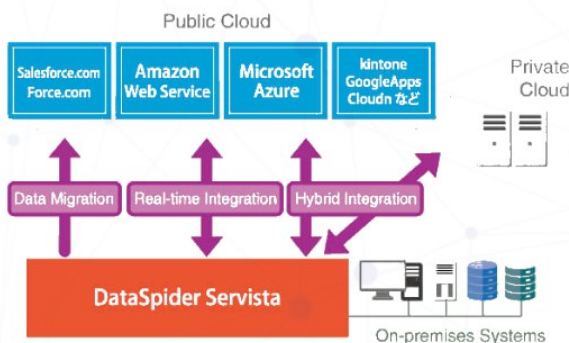

WE ONLY PROVIDE YOU WITH THE BEST FEATURES

Easily Integrate a Wide Variety of Environments

Any data can pass through DataSpider Servista, Connect your devices, applications, and services to enjoy the benefits of full integration. Data is your lifeblood, and now it's where you need it.

Integrate Cloud & On-Premises Systems

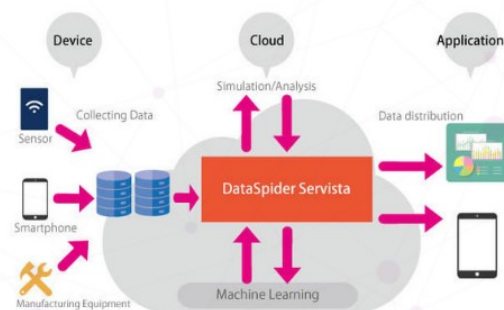

By using DataSpider Servista as your data hub, on-premises systems can be integrated with public and private clouds. Setting up is easy and will enable you to make changes efficiently as needs change.

Improve Your Business Intelligence

The obstacle for successful implementation of intelligence analytics is insufficient data. The appropriate data must be identified, collected, and processed. DataSpider Servista collects data from both inside and outside your company, then selects only the data required ensuring greater accuracy for your BI analytics.

Enable IoT Integration

Our world is increasingly interconnected through cloud services, applications, and devices. DataSpider Servista works seamlessly with IoT development, rapidly cooperating with anything that can configure IoT.
